# Alpen-Glow™
metallic pigments

System Features & Benefits:
- 12 vibrant colors offering a multitude of finishes
- 3-coat process
- 1-day application with next-day return to service
- UV stable
- Traction additives for improved slip resistance
- Gloss, satin or matte finish available

Combines synthetically produced metallic pigments with Sparta-Flex coatings to produce briliant color intensity and depth. A truly unique finish designed to compliment the most exclusive of environments.

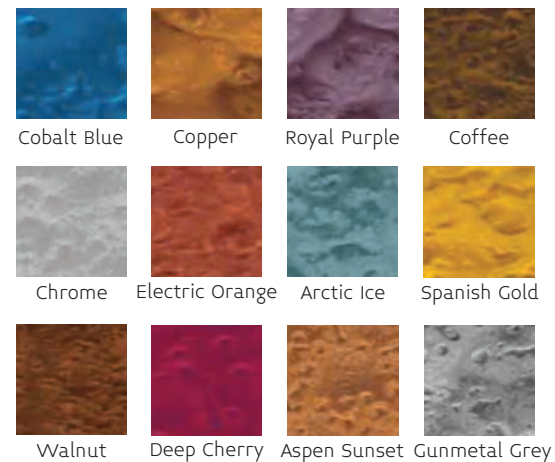

System Variations	Overall Thickness	Applications
Alpen-Glow	16 mils DFT	Highly decorative coating application, most popular within retail showrooms & similar settings
Alpen-Glow PURE	22 mils DFT	Minimal odor, VOC-free & interior applications

	350-352	Sparta-Grip Traction Additive	3 oz/gal

Recommended Surface Preparation: CSP 2-3, grind or shot blast, just no acid etching.

Recommended Maintenance: Regular floor washing, depending upon floor traffic, with a pH neutral cleaner. Simple Green diluted with water works well.
