WITH DTF 25 SH  
THE SURFACE IS  
CAREFULLY „GRINDED  
OFF“ INSTEAD OF  
CHIPPING IT AWAY.

Thus the machine runs calmly and produces a smooth surface.

The DTF 25 SH has a drum which is equipped with diamond blades. It removes the material very precise. For grooving or milling you can choose between two different diamond blades: one for rough and one for smooth surface preparation.

The machine is available as a 11 kW electrical version, 16.5 kW and 23 kW propane versions with a hydraulic traction unit.
